

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

INDEX TO THE SHEETS

## EXPLANATORY REMARKS.

---

The Scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is  $1\frac{1}{4}$  miles, and the breadth 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The Braces [  ] on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus —31'4.

The Scale of the County Plans is 6 inches to a mile, and each sheet contains 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet of the Parish Plans, as VI. 9., the first number referring to the County Plans, the second number to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

County Names .....		Hundreds or Wards .....	
Parishes, Ancient or Mother.....		Civil Parishes or Townships .....	
Extra Parochial .....		Division of Townships .....	
Municipal Wards.....			

<b>Antiquities</b> .....	{ ROMAN Druidical or Saxon Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream .....	<i>C.S.</i>	Centre of Fence .....	<i>C.F.</i>
Centre of Road .....	<i>C.R.</i>	Top of Cop .....	<i>T.C.</i>
Side of Stream or Drain ...	<i>S.S.</i> or <i>S.D.</i>	Centre of Wall .....	<i>C.W.</i>
Root of Hedge .....	<i>R.H.</i>	Defaced .....	<i>Def.</i>
Face of Wall .....	<i>F.W.</i>	Track of Stream.....	<i>T.S.</i>
Undefined .....		<i>Und.</i>	

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—The areas are computed to the centre or fence, or other boundary of enclosure, except in the following cases :—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c. bounding either side of a railway are included wholly within its area.

N.B.—to convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

## A R E A S.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

**N.B.**—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

Examples—

$$\begin{array}{r} \text{Acres.} \\ 633 \cdot 357 \\ \hline 4 \\ \hline 1 \cdot 428 \\ 40 \\ \hline \text{A. R. P.} \\ 633 \quad 1 \quad 17 \end{array}$$

$$\begin{array}{r} \text{Acres.} \\ 527 \cdot 013 \\ \hline 4 \\ \hline \cdot 052 \\ 40 \\ \hline \text{A. R. P.} \\ 527 \quad 0 \quad 2 \end{array}$$

INDEX TO THE SHEETS

## EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·844 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is 1½ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces ( / ) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

County Names .....	©	Hundreds or Wards .....	W
Parishes .....	P	Townships .....	T

The descriptions of the boundaries are shown by the following initials :—

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

INDEX TO THE SHEETS

*magus.*

# EXPLANATORY REMARKS.

of the Parish Plans is the 1-2500th of the actual length on the map is equal to 25·344 inches to a mile, or 3·157 chains to an inch, or approximately equal to one square inch to one acre, the square of the scale being equal to one acre.

Each sheet is  $1\frac{1}{2}$  miles, and the breadth 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book ; and of towns and large villages encircled by a red band, one number and one are given for the portion within the red band, unless they are contained wholly in one parish, in which case a number is given for the portion included in the parish.

Spaces [ ] on the plans are to indicate that the spaces so braced are included under the same reference number.

Heights in feet above the Mean Level of the Sea are written thus —31·4.

The scale of the County Plans is 6 inches to a mile, and each sheet contains one of the Parish Plans. There is therefore a double reference number to each of the Parish Plans, as VI. 9., the first number referring to the County and the second number to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles or twenty-four square miles, equal to 15,360 acres.

Following are the characters employed on the Ordnance Plans on the Scales of six and 6 inches to a mile :—

Hundreds or Wards .....	<b>C</b>	Hundreds or Wards .....	<b>H</b>
Ancient or Mother .....	<b>P</b>	Civil Parishes or Townships .....	<b>T</b>
Special .....	<b>E</b>	Division of Townships .....	<b>T</b>

*Norman or Subsequent*

Descriptions of the boundaries are shown by the following initials :—

Stream .....	<b>C.S.</b>	Centre of Fence .....	<b>C.F.</b>
Road .....	<b>C.R.</b>	Top of Cop .....	<b>T.C.</b>
Stream or Drain ...	<b>S.S. or S.D.</b>	Centre of Wall .....	<b>C.W.</b>
Edge .....	<b>R.H.</b>	Defaced .....	<b>Def.</b>
Wall .....	<b>F.W.</b>	Track of Stream .....	<b>T.S.</b>
Undefined .....			<b>Und.</b>

When a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases :—

1. When the fence or other boundary is also the boundary of a Parish or other Civil Division, and does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

2. Enclosures, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

## ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

## AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

# EXPLANATORY REMARKS.

The following are the Scales, &c., Characters of Writing and Boundary, Symbols, Abbreviations, &c., used on the Ordnance Plans of  $\frac{1}{2500}$ ,  $\frac{1}{2500}$ , and 6 Inches to 1 Mile, past and present:—

## SCALES, &c.

Examples showing how each kind of Plan is numbered.			Description of Plan.	Area of each Sheet.		Dimensions represented.		Scale.	Remarks.
County.	Parish.	Town.		Acres.	Sq. Miles.	Length.	Breadth.		
<b>County Plans</b>									
<b>IX.</b>			<b>Full Sheet</b>	15360	24	6 miles	4 miles	6 inches to 1 mile.	*
<b>IX. N.E.</b>			<b>Quarter Sheet</b>	3840	6	3 miles	2 miles	Do. do.	N.W., N.E., S.W., S.E. according to the position of Quarter Sheet.
<b>IX.</b>	<b>15</b>		<b>Parish Plans</b>	960	1½	1½ miles	1 mile	ratio of actual length on the ground, or 25' 344 inches to 1 mile, or 3' 187 chains to 1 inch.	The square of 1' 0018 inch = an acre, or approximately 1 square inch on the plan represents 1 acre.
<b>IX.</b>	<b>15</b>	<b>23</b>	<b>Town Plans</b>	38' 4	06	24 chains	16 chains	ratio of actual length on the ground, or 10' 56 feet to 1 mile, or 41' 06 feet to 1 inch.	Some towns have been done on 10 feet, and some 5 feet, to 1 mile.
<b>IX. — By a double reference number.</b>

## ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centra of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

## AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

## EXPLANATORY REMARKS.

The following are the Scales, &c., Characters of Writing and Boundary, Symbols, Abbreviations, &c., used on the Ordnance Plans of 1860, 1865, and 6 Inches to 1 Mile, past and present:—

### SCALES, &c.

Examples showing how each kind of Plan is numbered.			Description of Plan.	Area of each Sheet.		Dimensions represented.		Scale.	Remarks.
County.	Parish.	Town.		Acres.	Sq. Miles.	Length.	Breadth.		
IX.			County Plans						
			Full Sheet	15360	24	6 miles	4 miles	6 inches to 1 mile.	*
IX. S.E.			Quarter Sheet	3840	6	3 miles	3 miles	Do. do.	N.W., S.E., S.W., S.E. according to the position of Quarter Sheet.
IX.	16		Parish Plans	960	1½	1½ miles	1 mile	ratio of actual length on the ground, or 25·344 inches to 1 mile, or 3·157 chains to 1 inch.	The square of 1·0018 inch = an acre, or approximately 1 square inch on the plan represents 1 acre.
IX.	15	23	Town Plans	38·4	·06	24 chains	16 chains	ratio of actual length on the ground, or 10·56 feet to 1 mile, or 41·66 feet to 1 inch.	Some towns have been done on 10 feet, and some 5 feet, to 1 mile.
IX. — By a double reference number.									
IX. — By a treble reference number.

## ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

Abbreviations.	Descriptions of Boundaries.	Object and Descriptive Names.
B.	Bank, Baulk, Bottom, Boundary (By.).	Bridge, Box.
B. H.	- - - - -	Beer House.
B. M.	Boundary Mound (Md.), Mark.	Bench Mark.

## AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

## ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

## AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

## ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

## AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fences, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

## ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

## A R E A S.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

## ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

## AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

**N.B.**—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

## A R E A S.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

## ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

## AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

## EXPLANATORY REMARKS.

The Scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of an inch being equal to one acre.

The length of each sheet is  $1\frac{1}{2}$  miles, and the breadth 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book ; in the case of towns and large villages encircled by a red band, one number and only are given for the portion within the red band, unless they are contained within more than one parish, in which case a number is given for the portion included within each parish.

Braces [  ] on the plans are to indicate that the spaces so braced are included under the same reference number.

Altitudes in feet above the Mean Level of the Sea are written thus —31·4.

The Scale of the County Plans is 6 inches to a mile, and each sheet contains a list of the Parish Plans. There is therefore a double reference number to each sheet of the Parish Plans, as VI. 9., the first number referring to the County and the second number to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

Following are the characters employed on the Ordnance Plans on the Scales of 100, and 6 inches to a mile :—

Names .....		Hundreds or Wards .....	
Parish, Ancient or Mother.....		Civil Parishes or Townships .....	
Parochial .....		Division of Townships .....	
Municipal Wards..... 			

Boundaries .....	<div style="display: inline-block; vertical-align: middle; font-size: 3em;">{</div> <div style="display: inline-block; vertical-align: middle;"> <p>ROMAN</p> <p><i>Druidical or Saxon</i></p> <p><i>Norwegian or Subsequent</i></p> </div>
------------------	---

The descriptions of the boundaries are shown by the following initials :—

Top of Stream .....	<i>C.S.</i>	Centre of Fence .....	<i>C.F.</i>
Top of Road .....	<i>C.R.</i>	Top of Cop .....	<i>T.C.</i>
Stream or Drain ...	<i>S.S.</i> or <i>S.D.</i>	Centre of Wall .....	<i>C.W.</i>
Hedge .....	<i>R.H.</i>	Defaced .....	<i>Def.</i>
Wall .....	<i>F.W.</i>	Track of Stream.....	<i>T.S.</i>
Undefined .....	<i>Und.</i>		

When a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

—The areas are computed to the centre of fence, or other boundary of the enclosure, except in the following cases :—

When the fence or other boundary is also the boundary of a Parish or other Civil Division, and does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

## ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

## AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

## ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

## A R E A S.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

## ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

## AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

## ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

## AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

# EXPLANATORY REMARKS.

ORDNANCE SURVEY OF ENGLAND

PARISH OF FRESTON

# EXPLANATORY REMARKS.

Scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1 inch being equal to one acre.

The length of each sheet is 1½ miles, and the breadth 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and only one are given for the portion within the red band, unless they are contained within more than one parish, in which case a number is given for the portion included in each parish.

Braces [ } ] on the plans are to indicate that the spaces so braced are included under the same reference number.

Altitudes in feet above the Mean Level of the Sea are written thus —31·4.

Scale of the County Plans is 6 inches to a mile, and each sheet contains 36 sheets of the Parish Plans. There is therefore a double reference number to each sheet of the Parish Plans, as VI. 9., the first number referring to the County and the second number to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1 inch to 1 mile, 2½ inches to 1 mile, and 6 inches to 1 mile :—

Names .....	Ⓒ	Hundreds or Wards .....	H

of Wall .....	F.W.	Track of Stream.....	T.S.
Undefined.....	Und.		

When a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

3.—The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases :—

When the fence or other boundary is also the boundary of a Parish or other Civil Division, and does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

## ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

## AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

## AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

**N.B.**—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

Area Brace, indicating that the areas of spaces so connected are included in the same reference number .....		Change of Boundary, indicating the point at which the character of a Boundary changes .....	
Arrow showing direction of flow of water.....		Levelling Picket.....	
		Trigonometrical Station.....	

## ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. E. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

## A R E A S.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

**N.B.**—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

## EXPLANATORY REMARKS.

The following are the Scales, &c., Characters of Writing and Boundary, Symbols, Abbreviations, &c., used on the Ordnance Plans of  $\frac{1}{2500}$ ,  $\frac{1}{25000}$ , and 6 Inches to 1 Mile, past and present:—

### SCALES, &c.

Examples showing how each kind of Plan is numbered.			Description of Plan.	Area of each Sheet.		Dimensions represented.		Scale.	Remarks.
County.	Parish.	Town.		Acres.	Sq. Miles.	Length.	Breadth.		
IX.			County Plans						
			Full Sheet	15360	24	6 miles	4 miles	6 inches to 1 mile.	*
IX. N.E.			Quarter Sheet	3840	6	3 miles	2 miles	Do. do.	N.W., N.E., S.W., S.E. according to the position of Quarter Sheet.
IX.	15		Parish Plans	960	1½	1½ miles	1 mile	$\frac{1}{2500}$ of actual length on the ground, or 25·344 inches to 1 mile, or 3·157 chains to 1 inch.	The square of 1·0018 inch = an acre, or approximately 1 square inch on the plan represents 1 acre.
IX.	15	23	Town Plans	38·4	·06	24 chains	16 chains	$\frac{1}{2500}$ of actual length on the ground, or 10·56 feet to 1 mile, or 41·66 feet to 1 inch.	Some towns have been done on 10 feet, and some 5 feet, to 1 mile.

C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

## A R E A S.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

# EXPLANATORY REMARKS.

scale of the Parish Plans is the 1-2500th of the actual length on the land and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, very approximately equal to one square inch to one acre, the square of each being equal to one acre.

Length of each sheet is 1½ miles, and the breadth 1 mile, the area of each therefore 960 acres.

Enclosure has a reference number to the area which is given in this Book ; of towns and large villages encircled by a red band, one number and are given for the portion within the red band, unless they are contained in one parish, in which case a number is given for the portion included in the parish.

Spaces [ \ ] on the plans are to indicate that the spaces so braced are under the same reference number.

Altitudes in feet above the Mean Level of the Sea are written thus —31'4.

Scale of the County Plans is 6 inches to a mile, and each sheet contains one of the Parish Plans. There is therefore a double reference number to each of the Parish Plans, as VI. 9., the first number referring to the County and the second number to the Parish Plans.

Dimensions of the sheets on the Six-inch scale being four miles by six miles are twenty-four square miles, equal to 15,360 acres.

Following are the characters employed on the Ordnance Plans on the Scales of 10, and 6 inches to a mile :—

Names .....	©	Hundreds or Wards .....	H
Ancient or Mother.....	P	Civil Parishes or Townships .....	T
Prochial .....	E	Division of Townships .....	T
Municipal Wards.....	W		

Names .....	ROMAN
	Druidical or Saxon
	Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

of Stream .....	C.S.	Centre of Fence .....	C.F.
of Road .....	C.R.	Top of Cop .....	T.C.
Stream or Drain ...	S.S. or S.D.	Centre of Wall .....	C.W.
Hedge .....	R.H.	Defaced .....	Def.
Wall .....	F.W.	Track of Stream.....	T.S.
Undefined.....	Und.		

When a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

—The areas are computed to the centre of fence, or other boundary of the parish, except in the following cases :—

When the fence or other boundary is also the boundary of a Parish or other Civil Division, and does not follow the centre of the fence, the area is calculated to the Parish or other boundary, not to the centre.

The fences, &c., bounding either side of a railway are included wholly within its area.

## A R E A S.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

C<sup>d</sup> SUFFOLK

INDEX TO THE SHEETS

## EXPLANATORY REMARKS.

The Scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is  $1\frac{1}{2}$  miles, and the breadth 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book ; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The Braces [ *⌋* ] on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus — 31·4.

The Scale of the County Plans is 6 inches to a mile, and each sheet contains 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet of the Parish Plans, as VI. 9., the first number referring to the County Plans, the second number to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

County Names .....	<b>C</b>	Hundreds or Wards .....	<b>H</b>
Parishes, Ancient or Mother.....	<b>P</b>	Civil Parishes or Townships .....	<b>T</b>
Extra Parochial.....	<b>E</b>	Division of Townships .....	<b>T</b>
Municipal Wards.....	<b>W</b>		

Antiquities .....	<div style="display: inline-block; vertical-align: middle;"> <b>ROMAN</b>  <i>Anglo-Saxon</i>  <i>Norman or Subsequent</i> </div>
-------------------	---

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream .....	<i>C.S.</i>	Centre of Fence .....	<i>C.F.</i>
Centre of Road .....	<i>C.R.</i>	Top of Cop .....	<i>T.C.</i>
Side of Stream or Drain ...	<i>S.S.</i> or <i>S.D.</i>	Centre of Wall .....	<i>C.W.</i>
Foot of Hedge .....	<i>R.H.</i>	Defaced .....	<i>Def.</i>
Face of Wall .....	<i>F.W.</i>	Track of Stream.....	<i>T.S.</i>
Undefined .....			<i>Und.</i>

Where a change occurs in the boundaries, the symbol [ *o—o* ] is used to show the part at which the change takes place.

N.B.—The areas are computed to the centre or fence, or other boundary of enclosure, except in the following cases :—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre

(2.) The fences, &c. bounding either side of a railway are included wholly within its area.

N.B.—to convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

## ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sea Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

## AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

Examples—

A.	R.	P.	Acres.	Acres.

			4	4
			1·428	·052
			40	40

## A R E A S.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

## ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

## AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

## ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

## A R E A S.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

INDEX TO THE SHEETS

# EXPLANATORY REMARKS.

Scale of the Parish Plans is the 1-2500th of the actual length on the , and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, is very approximately equal to one square inch to one acre, the square of 1 inch being equal to one acre.

length of each sheet is  $1\frac{1}{2}$  miles, and the breadth 1 mile, the area of each is therefore 960 acres.

An enclosure has a reference number to the area which is given in this Book ; case of towns and large villages encircled by a red band, one number and only are given for the portion within the red band, unless they are contained than one parish, in which case a number is given for the portion included parish.

Braces [ \ ] on the plans are to indicate that the spaces so braced are in under the same reference number.

Altitudes in feet above the Mean Level of the Sea are written thus —31·4.

Scale of the County Plans is 6 inches to a mile, and each sheet contains its of the Parish Plans. There is therefore a double reference number to feet of the Parish Plans, as VI. 9., the first number referring to the County the second number to the Parish Plans.

dimensions of the sheets on the Six-inch scale being four miles by six miles is twenty-four square miles, equal to 15,360 acres.

following are the characters employed on the Ordnance Plans on the Scales 600, and 6 inches to a mile :—

When a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

B.—The areas are computed to the centre of fence, or other boundary of sure, except in the following cases :—

- When the fence or other boundary is also the boundary of a Parish or other Civil Division, does not follow the centre of the fence, the area is calculated to the Parish or other boundary, not to the centre.
- The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

## SYMBOLS.

Antiquities, Site of.....		Bench Mark.....	
Area Brace, indicating that the areas of spaces so connected are included in the same reference number.....		Change of Boundary, indicating the point at which the character of a Boundary changes.....	
Arrow showing direction of flow of water.....		Levelling Picket.....	
		Trigonometrical Station.....	

## ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination; thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water:	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

## AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.
